

TUDOR

BLACK BAY 31/36/39/41 S&G

TUDOR presents a new version of its Black Bay line in steel and yellow gold with a fixed bezel. All fitted with Manufacture Calibres, the models come in four sizes, with a five-link bracelet and clasp with rapid adjustment.

The Black Bay 31, 36, 39 and 41 S&G models bring a unique aesthetic to the Black Bay line. Their curved cases, highlighted with polished yellow gold sections, offer a language that departs slightly from the brand's iconic tool watch spirit to embrace a sophisticated, versatile, unisex chic. Fitted with Manufacture Calibres, including reference MT5201 which ushers in a new family of TUDOR movements, these models are at the cutting edge of technical watchmaking refinement. Another important feature for optimum comfort is the five-link bracelet which comes with the TUDOR "T-fit" clasp, with rapid adjustment, in all sizes.

Black or silver dial

“Snowflake” hands,
a hallmark of TUDOR divers’ watches
introduced in 1969, with Grade A
Swiss Super-LumiNova®
luminescent material

Manufacture Calibres MT5201 (31 mm),

31, 36, 39 or 41 mm in diameter, in 316L steel or
yellow gold. Also available with a diamond-set
bezel

Five-link bracelet in 316L steel
and yellow gold with TUDOR “T-fit”
clasp with rapid adjustment

Five-year transferable guarantee with no requirement for registration or periodic maintenance checks

A CASE MADE OF CURVES AND SPARKLES

The case of the Black Bay 31, 36, 39 and 41 S&G models presents a sophisticated, curved vision of the famous Black Bay aesthetic. With its polished and domed sides in all available sizes, its soft silhouette is accentuated by a new curved winding crown. In addition to the seductive curves, the polished yellow gold of the bezel and crown is new to the Black Bay line, as the precious metals used to date have been exclusively satin-brushed for a matt finish. There is also the option of a diamond-set bezel for sizes 31, 36 and 39, a chic detail that enhances the watch's sparkle on the wrist.

TUDOR

MANUFACTURE CALIBRES

With the introduction of the *Manufacture* Calibre MT5201, TUDOR now offers three families of self-winding movement - large (MT56), medium (MT54) and small (MT52). *Manufacture* Calibre MT5201 was specifically developed to power watches with smaller dimensions.

TUDOR *Manufacture* Calibres have been designed to ensure robustness, longevity, reliability and precision, as has the variable inertia balance, which is maintained by a sturdy traversing bridge with a two-point fixation. Together with their non-magnetic silicon balance spring, they are certified as a chronometer by the Official Swiss Chronometer Testing Institute (COSC), with its performance going beyond the standards set by this independent institute.

Another notable feature is that the power reserve of the large and medium-sized TUDOR *Manufacture* Calibres is «weekend-proof», about 70 hours. This enables the wearer to take the watch off on a Friday evening and put it back on again on Monday morning without having to reset it. For the *Manufacture* Calibre MT5201 (family of small movements), the power reserve is approximately 50 hours.

FIVE-LINK BRACELETS AND CLASP WITH RAPID ADJUSTMENT

All Black Bay 31, 36, 39 and 41 S&G models are available on a five-link bracelet in 316L steel and yellow gold. It comes complete with a robust clasp in 316L steel with TUDOR "T-fit" rapid adjustment system for the length. Easy to use, requiring no tools and offering five positions, this practical system allows the wearer to carry out a fine, instant adjustment of up to 8mm on the clasp.

THE ESSENCE OF BLACK BAY

The Black Bay line features dials inspired by the TUDOR divers' watches produced during the 1950s. It borrows the characteristic angular hands known to collectors as "Snowflake" from models that appeared in the brand's 1969 catalogue. Its unprotected crown and the characteristics of its case are reminiscent of the first generations of TUDOR divers' watches.

The Black Bay line is the result of the subtle blend of traditional aesthetics and contemporary watchmaking. Far from simply being an identical re-release of a classic, it brings together over sixty years of TUDOR divers' watches at the same time as being resolutely anchored in the present. Whilst it is neo-vintage in conception, its manufacturing techniques, reliability, robustness and the quality of its finish are consistent with today's more rigorous requirements.

THE TUDOR GUARANTEE

Since the brand's creation by Hans Wilsdorf in 1926 and in line with his vision of an exceptional timepiece, TUDOR has been ceaselessly creating watches that are as robust, durable, reliable and precise as possible. On the strength of this experience, and confident in the superior quality of its watches, TUDOR offers a five-year guarantee for all its products. This guarantee does not require the watch to be registered or submitted to periodic checks and is transferable.

ABOUT TUDOR

TUDOR is an award-winning Swiss-made watch brand, offering mechanical watches with sophisticated style, proven reliability and unmatched value for money. The origins of TUDOR date back to 1926, when "The Tudor" was first registered as a brand on behalf of the founder of Rolex, Hans Wilsdorf. He officially set up the Montres TUDOR SA company in 1946 to produce watches that respect the traditional Rolex philosophy of quality at a more affordable price point. Because of their robustness and affordability, throughout their history TUDOR watches have been chosen by the boldest adventurers on land, in the air, underwater and on ice. Today the TUDOR collection includes emblematic models such as Black Bay, Pelagos, 1926 and Royal. Since 2015, TUDOR has also offered models with mechanical *Manufacture* Calibres with multiple functions and superior performance.
